Contents:

- TOPAKUSTIK edge mouldings and lighting inserts
- New ISO 354 Sound Tests
- Topakustik replaces Metal Ceiling – Metal / Construction / Topakustik
- We are closed for Easter from Friday 14. to Monday 17. April (Fri. Sat. Son. Mon.)
- P.S.: Hustle and bustle jazzy! Second installment

TOPAKUSTIK® - Edge mouldings and lighting inserts

A perfect ceiling needs a perfect finish. We have three standard edge moulding solutions (standard Type 1 edge mouldings are shown in the first two photographs below). There are numerous other non-standard possibilities and some of these are shown below.

New ISO 354 Sound Tests

Acoustic panels with small diameter perforations are increasingly popular. Therefore we have tested the following small perforation patterns with very good absorption values:

TOPPERFO® CLOU	Perforation 4/4/1.2	(Perfo-Distance 4 mm ,	∅ 1.2 mm)
TOPPERFO® CLOU	Perforation 8/8/2	(Perfo-Distance 8 mm ,	∅ 2.0 mm)
TOPPERFO® - T	Perforation 16/16/12-2	(Perfo-Distance 16 mm ,	∅ 2.0 mm)

After Easter we will send you product samples and test data.

Topakustik replaces Metal Ceiling – Metal / Construction / Topakustik

A customer from Zurich has sent us some pictures from his project where the metal ceiling was replaced with a Topakustik ceiling:
